DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. patent number 5,450,495 (Goldfarb).

Regarding claim 1, Goldfarb discloses a structure with push-pull unit speakers generally comprising a sound box (figure 3 a cylindrical box column 5 lines 5-20 , two unit speakers (27, 28 are identical speakers), and an echo pipe (31), which is characterized that the magnetic poles of the electromagnetism structure of the two unit speakers are respectively formed with N/S and S/N, between which a magnetic structure is provided connecting with the electromagnetism structure of one of the unit speakers, and further the polarities of the two ends of the magnetic structure is made to be repulsive to the polarities of the foregoing two electromagnetism structures, respectively; by a mutual push-pull action in the magnetic fields from the added magnets after electric conduction, distortion of the speaker is solved; in the mean time stability may also be

enhanced at low frequency, and the sound pressure and the efficiency and power bearable by speaker are increased.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent number 5,450,495 (Goldfarb).

Regarding claim 2, Goldfarb does not disclose the added magnetic structures.

However, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to use an additional magnet for increasing electromagnetic strength.
